

## HOSE PROGRAMME – SAND AND GRAVEL

### HIGH-VACUUM DREDGING HOSE

For use as an expansion joint in suction and pressure lines. As a suction hose on suction dredgers with narrow bending radiuses. To handle fine and coarse-grained materials. Also suitable for tough transport applications of dry materials in the mining field.

- Construction:
- Highly abrasion-resistant tube
  - Tension and pressure-resistant special fabric inlays
  - Concealed steel rings
  - UV, ozone and weather-resistant, abrasion-resistant cover
  - Interior smooth, exterior deep corrugated

ND [mm]	Wall thickness	WP [bar]	Vacuum approx. [bar]	Max. length [m]
200	18	10	0.9	10
250	20	10	0.9	10
300	22	10	0.9	10
400	24	6	0.9	5
500	26	6	0.9	5

Cut to length with built-in flanges.
